

Ahrefs SEO and All in One SEO: Actually more than one SEO plugin shouldn't be installed. Because they are conflicted with each other. We are going to work by yoast SEO plugin. If having any conflict with other plugins then It's harmful for our seo result.

Google Analytics for WordPress by MonsterInsights: Where as we are going to newly seo tuning of the whole site, so we want a lightweight full website. Otherwise, this plugin is much usable if you use the premium version. Only free version have basic feature, so it's not usable.

IndexNow : You didn't get more advantage by this. You had better manually index.

KingComposer: Maybe, you couldn't use this page builder.

Simple Google reCAPTCHA: You didn't get advantage by this and otherwise you already have the same type of plugin such as Contact Form 7 Captcha.

Site Kit by Google: This plugin is good but you have to get all in your google search console. You can install it afterwards when you get ranked but not yet.

User Login History: I thinks, This plugin isn't used on the site.

WPForms Lite: I thinks, This plugin isn't used on the site and you already have the same type of plugin such as Contact Form 7.
